PROFESSIONAL SUMMARY

Junior Full-Stack Developer, EU citizen based in Brussels with work authorization in Belgium. Builds web applications with React, Next.js, TypeScript and Node.js, including a pharmacy marketplace developed with a pharmacy owner as domain advisor, where regulatory constraints and inconsistent third-party data shaped the design. Built and deployed a full-stack app with Express, MongoDB and JWT authentication on a cloud server. Clean code, semantic commits and feature branches with preview deployments. Uses AI tools daily and validates every output before it reaches production. TripleTen bootcamp graduate. Fluent in English (C1).

TECHNICAL SKILLS

- Front-End: TypeScript, React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, CSS Modules, Responsive Design, Server-Side Rendering, React Router DOM, Context API, BEM, AJAX, Promises/Async Programming
- Back-End: Node.js, Express.js, REST API Design, MVC Architecture
- AI-Assisted Development: Claude Code, GitHub Copilot
- Testing: Vitest
- Database: MongoDB, Mongoose, SQL (fundamentals)
- Auth and Security: JWT Authentication, Auth Middleware, Password Hashing, Protected Routes
- Build and Version Control: Vite, npm, ESLint, Prettier, Git, GitHub (Semantic Commits, Branching Strategies)
- Cloud & Deployment: Google Cloud Platform, Virtual Machines, SSH, Vercel

PROJECTS

News Explorer – Full Stack – HTML, CSS, JavaScript, Vite, React, Node.js, Express, MongoDB, Mongoose, JWT, REST APIs
Full-stack app to search articles through an external API, save favorites and manage a personal collection. React front end with loading, error and empty states, connected to a Node.js/Express REST API with MongoDB and JWT authentication. Deployed on a Google Cloud VM with a custom domain.

Pharmacy Marketplace – Next.js, React, TypeScript, Tailwind CSS, Vercel
Mobile-first marketplace to compare medication prices across independent pharmacies, built with a pharmacy owner as domain advisor. Products are modelled around EAN barcodes so listings with inconsistent naming resolve to one catalogue entry, and Brazilian pharmaceutical regulation is encoded in the type system to block online sale of controlled substances. Search and filters live in URL parameters to keep server-side rendering.
GitHub: private repository, available on request
Live: https://pharmacy-marketplace-peach.vercel.app

NutriBase Body Fat Calculator – HTML, CSS, JavaScript, Vite, Vitest, React, TypeScript
React and TypeScript calculator that implements a body fat percentage formula. Found why the production bundle was oversized and cut it by 85% (from 11.6 MB to 1.7 MB) by optimizing image assets, then verified the change with Vitest unit tests.

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer, Independent Projects, Remote, Sep 2025 - Present

- Independently designed, built and shipped full-stack web applications end to end, from database schema to deployment, using React, Next.js, TypeScript, Node.js, Express and MongoDB
- Implemented secure authentication with JWT, including protected routes, middleware, session persistence and password hashing
- Diagnosed and resolved bugs across the full stack, investigating root causes before fixing instead of applying temporary patches, including a production server outage
- Built reusable, typed React components with Context API state, lifted state patterns and controlled forms
- Cut a production bundle by 85% (11.6 MB to 1.7 MB) after finding the cause, and verified the change with Vitest unit tests
- Deployed to Google Cloud and Vercel with custom domains, managing Linux virtual machines via SSH
- Kept a clean Git history with semantic commits and structured branching strategies
- Used AI tools (Claude Code, GitHub Copilot) daily, reviewing and validating every output before using it

EDUCATION

TripleTen Full-Stack Web Development Bootcamp, 2025 – 2026

18-month intensive program covering React, Node.js, Express, TypeScript, REST APIs, MongoDB and cloud deployment, with multiple full-stack projects built from concept to production.

CERTIFICATIONS AND COURSES

- **SQL from Beginner to Advanced, Udemy (in progress, 2026)**
- **TypeScript from Basic to Advanced, with React and Express, Udemy (Jul 2026):** static typing, interfaces, classes and object-oriented concepts
- **Python Fundamentals, Curso em Vídeo (Oct 2025):** practical course covering Python fundamentals, programming logic, variables, data types, conditionals, and basic data structures.
- **Git and GitHub, Curso em Vídeo (May 2025) and Le Wagon (May 2025):** practical courses covering version control, repository management, branching, commits, and collaborative development workflows.

LANGUAGES

- English – Fluent – TOEFL iBT C1, Score: 101
- Portuguese – Native
